PROFESSIONAL SUMMARY

Full-stack developer with 2+ years of experience building data-driven web applications for banking clients including Maybank and Standard Chartered. Comfortable across the stack — React interfaces and Node.js REST APIs through to Oracle PL/SQL procedures and data pipelines. Known for turning ambiguous client requirements into working features, debugging end-to-end from UI to query plan, and shipping reliably in cross-functional teams.

TECHNICAL SKILLS

Frontend	React, JavaScript (ES6+), HTML5, CSS3, component-based UI, REST API integration
Backend	Node.js, REST API design & development, Oracle PL/SQL, stored procedures, business-rule validation
Databases	Oracle, MySQL, MSSQL, SQL, DBMS design, query optimisation, DML/DDDL
Languages & Tools	JavaScript, Python, SQL, DBeaver, Git, Databricks

PROFESSIONAL EXPERIENCE

Data Engineer | Unisontech Services India Pvt. Ltd.

Apr 2024 – Present

formerly RiskInsight Consulting Pvt Ltd — delivery partner to banking clients including Maybank and Standard Chartered Bank

Client: Maybank — Data Lineage Platform | Apr 2026 – Present

- Building the **React** frontend for Maybank's data lineage platform — interactive lineage views that let data and governance teams trace any field back to its source system without reading pipeline code.
- Developed reusable components wired to backend lineage APIs, rendering large lineage datasets reliably in the browser.

Regulatory Reporting Platform | Nov 2024 – Present

- Built dynamic UI screens in **React** and integrated **Node.js REST APIs** for a regulatory reporting product, replacing manual query work for client reporting teams.
- Debug and resolve issues across the full stack — React rendering, API contracts and slow SQL across **Oracle, MySQL and MSSQL** — cutting turnaround on client-reported defects.

Internal Cashflow Reporting Module | May 2025 – Dec 2025

- Built an end-to-end pipeline that loaded external source files into staging tables, validated every row against business rules, and produced audited cashflow outputs for downstream reports.
- Authored **Oracle PL/SQL procedures** generating cashflows for LoanDepot and Security tables, replacing manual calculation steps with a repeatable process.

Client: Standard Chartered Bank — SAS2Python Migration | Apr 2024 – Oct 2024

- Migrated legacy **SAS** programs to modular **Python**, removing the client's dependency on licensed SAS tooling.
- Unit-tested the migrated code against sample datasets to verify output parity with the legacy programs before sign-off.

CERTIFICATIONS & AWARDS

- Databricks Certified Data Engineer Professional**
- Reliable Performer Award** — Unisontech Services India Pvt. Ltd.
- 2nd Prize**, Andhra Pradesh State Chess Tournament

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

CGPA 8.05

Santhiram Engineering College, Nandyal
